### MAY ERECT PICTURE HOUSE

Mr. J. Keifer, of Daysland, proprietor of the Keifer theatres was in Irma, Wednesday looking over the prospects of building a show house in Irma. Mr. Keifer has the reputation of putting on the best class of shows of any of the smaller show places in Alberta and if he locates in Irma we can assure him of a good patronage from the Irma residents.

#### NOTICE

While you are housecleaning sort out the clothing for which you have no further use, and pass it on to the needy. A bale of clothing is being sent to the Indian Reserve at Hobema, from Irma. So please leave your contributions with Mrs. McFarland or Mrs. Wright.

Many friends will be pleased to hear that Miss Evelyn D. Corbett, of Kinsella, has passed with honors the examinations for license to practice, conducted by the University on behalf of the Affiliated Professional Societies.

### NEWS ITEMS FROM KINSELLA

Mr. Grant Thompson is leaving this week for Flint, Michigan to visit his father.

Mr. and Mrs. Anderson spent last Wednesday at the Jamieson Ranch. Mrs. McFarland, daughter Marjorie and son Ross and Mrs. J. N. C. Seton of Irma spent Wednesday with Mrs. Ross Eaton.

Mrs. Wm. Rees and infant daughter returned from Viking Hospital on Friday.

Mr. E. C. Williams delivered a new Chevrolet Sedan to the Henick Bros., north east of town on Saturday evening.

Rees and Williams sold two McCormick Deering tractors, one to Johnson Bros., and one to Mr. Seonie.

Mr. Ben Wachter of the B. & B. gang of the C. N. R. spent Sunday at his home here.

Mr. M. Lovell who has been working for the Jamieson Construction Co., here left for his home in England on Monday.

Mr. and Mrs. P. J. Wangness spent a few days in Edmonton this week.

### CHURCH NOTICES AND ACTIVITIES

#### CIRCUIT PICNIC

Saturday afternoon, June 2nd is the date set for the United Church family picnic including the whole circuit. The place of meeting is the Fair grounds. Free ice-cream and sports are the order of the day. Everybody bring eats, and eat together as one big family.

A happy re-union Volley Ball game has been placed on the High School grounds. Anyone wishing to play may get the ball at the Manse and return it when through with it.

Miss Mix, a Provincial Secretary in Young People's Work is expected next Monday, May 28. Watch for further announcement.

Moving pictures Friday night, June 1st at 8 p.m. in the Church.

#### SUNDAY SCHOOL LIBRARY

If you have books that your family has read, kindly place them at the disposal of the Sunday School that they may form the nucleus of a library. The Sunday School executive will then add to the list as they see fit. Holiday or no holiday, books are friends and will add to the enjoyment of all during the summer. Do it now.

#### PARENTS TAKE NOTICE

The Sunday School Executive is offering prizes to the intermediate classes, in memory work. A first and second prize will be given to those in each class standing first and second.

There must be at least a One Year course covered and the one in each class covering the most will receive \$5.00 from the picture fund, providing they attend a provincial Trail Range or C. G. I. T. Camp in July. The second prize will be \$3.00 toward that end. Failing to attend the money will be given to the second, and \$3.00 to the third. The first will receive a Book as a souvenir of work well done.

The idea is to create an interest in the memory course in the Sunday School and to encourage delegates to attend the Provincial Camps. The fee for ten days at camp is \$10 and \$2.00 registration fee. This includes everything except transportation.

### JARROW SPORTS DAY, JUNE 4th

The annual Jarrow Sports Day will be held on Monday, June 4th under the auspices of the Jarrow Board of Trade. A full line of sports events, including baseball for which \$25.00 has been put up, also \$25.00 for a bucking contest, besides novelty races, foot races, horse races for which suitable prizes have been put up for all events. A big dance in the evening will finish the day's amusements. The admission to the grounds is 50 cents for adults, children free.

For further information apply H. H. McDougall, president, or P. R. Bannsey, Secretary. See the posters and remember the day.

### PUBLIC NOTICE MUNICIPAL DISTRICT OF BATTLE RIVER No. 423

Notice is hereby given that if all arrears of taxes in respect of any parcel of land situated within this municipality are not paid-on before the first day of July next, such land will be dealt with under the provisions of The Tax Recovery Act, 1922, with a view to obtaining certificate of title in the name of the municipality in respect of such parcel.

35-7 R. J. TATE, Sec. Treas.

### BABY CHICKS IN STRONG DEMAND

Over ten thousand chicks have been distributed during the past spring from the Provincial Government Poultry Plant at Oliver. Officials in charge of the plant report that the demand has been greatly in excess of the supply and that many applicants have been referred to other breeders and hatcheries for their requirements. The breeds represented in the shipments include White Leghorns, Barred Rocks and White Wyandottes.

Over three thousand chicks are being reared on the farm this spring, and in view of their increasing economic importance, a beginning is being made this year with turkeys.

"What would you do if you had no wife to look after your clothes?" asked a local lady of her husband. "Have money to buy new ones," replied the brute.

### The Wastebasket

GEOGRAPHICAL GOULASH  
A party of travellers went into a restaurant at Vegreville one day last week and the following conversation ensued:

Waitress—"Hawaii, gentlemen, 'You must be Hungary.'"  
First Man—"Yes, Siam, and we cannot Rumania long, either; Venice it read."

Waitress—"I'll Russia to a table. Will you Havana?"

F. M.—"Anything at all, but can't Jamaica little speed?"

Waitress—"I don't think we can Fiji that fast, but Alaska."

F. M.—"Never mind asking anyone, just put a Cuba sugar in our Java."

Waitress—"Sweden it yourself. I'm only here to Serbia."

F. M.—"Denmark our bill and call the Bosphorus. Hell probably Kan-ya. I Don't Bolivia know who I am."

Waitress—"No, and I don't Caribbean; you're guys sure Armenians." Boss—"Samoa your wisecracks, is it? What's got India? You think maybe this arguing Alps business?" Customer—"Canada racket! 'Spain in the neck.'"

"If dresses get much shorter, says an exchange, the girls will have to be vaccinated by Christian Science so it won't show."

### BANK MANAGER ROUTS YEGGMEN

CAMROSE, May 19—Yeggs were frustrated in the early hours of this morning from getting away with a large sum of money from a sub-branch of the Imperial Bank of Canada at Edmore, twenty-six miles south of Camrose.

Only the presence of mind and courage of the Manager M. J. Cook prevented the success of the robbers.

Mr. and Mrs. Cook had been attending a party Friday night southeast of the village. They returned to Edmore about 2:10 and parked their car, as was their custom in front of the bank building.

Mr. Cook thought of trying the door before retiring and found it unlocked. Opening the door and stepping inside he was told to "sit 'em up."

Disobeying the order he ducked, and ran across the street, the yeggs having taken a shot at him, fortunately without effect.

Calling for help and obtaining a small rifle, he opened fire at the front of the building, which is frame, endeavoring to place the shots where he thought they would penetrate through to the robbers.

In the darkness the yeggs got out of the building and took flight in an automobile.

### The Wheat Pool Brings About a New Condition of Affairs

Over eight months have passed since the commencement of the crop year on September 1, 1927, and ninety per cent. of the crop has been delivered. The great bulk of non-Pool wheat has left the growers' hands.

Except for those who have not had their grain threshed owing to weather conditions, and the few who held their grain since last harvest, the non-Pool farmers have little concern in the present higher prices for wheat. The 'average closing prices' extol on the lips of the Grain Trade should really be figured during the time the bulk is going on the market. That is, from September to April. With very little wheat in non-Pool farmers' hands, how can they be benefited by high prices from now on?

Wheat Pool members, on the other hand, have a vital interest in present prices. They have seen their Pool start the crop year under a burden of tremendous wheat supplies, and a handicap of a cloud of 'bearish' news. Last fall grain poured in rivers into Winnipeg, and Vancouver's facilities were taxed to the limit. Argentin had raised a tremendous crop. Europe's production was up by millions of bushels. The United States' wheat crop was heavy and altogether things did not look any too rosy.

The Canadian Pool had a difficult task on hand and Pool members may have a good excuse for a feeling of elation at the successful manner in which a grave situation was handled by the organization they had created. Pool members are now in a position to participate in an appreciable extent in the rising market prices.

If there was no Wheat Pool in Western Canada what would the situation have been? The bulk of the wheat would be out of the farmers' hands and in the hands of market intermediaries who would reap a very rich profit indeed. The Wheat Pool has changed this situation in a decided fashion. Now Pool members can sit back unworried and feel assured they will get the best year's average price for the product of their labors.

**NO ONE IS GOING TO EXTRACT EXTRAORDINARY PROFITS FROM POOL WHEAT.**

Farmers should realize that only by the Power of Control of Volume has the Wheat Pool been able to function efficiently. This volume is assured by Signed Contracts.

Join your brother Pool members in this vital undertaking.

For Humanity!

The world scrolls upon which is inscribed the names of men and women who have rendered distinguished service to the cause of humanity. No name more worthy of such recognition than that of Henri Dunant, the initiator of whose birth in Geneva, Switzerland, was observed throughout the world on May 28, of this year, and who lived to the ripe old age of 82 years.

What service did Henri Dunant render to mankind entitling him to this honor? As a young man of 21 years, Dunant, author and philosopher, was traveling for pleasure in the summer of 1859 in Northern Italy, and happened to arrive in the neighborhood of Solferino just at the conclusion of the battle which is known by that name, and which was waged between the Austrians under Francis Joseph I. and the Allied French and Sardinians. The opposing forces were of about equal strength, the total of men engaged being something over 300,000. The armies met in the early morning and fought a sanguinary conflict until about two o'clock in the afternoon, when the Austrians were forced to retire. For so short a battle the losses were large, totalling in killed, wounded, and missing almost 40,000.

Upon such a scene of carnage came Henri Dunant accidentally in the course of his journey for pleasure. Suffering and dying soldiers left on the field filled the air with their cries and groans, but there was no organized care for them. His deepest sympathies stirred for these fellowmen, who but a few hours before were in the pride of health and strength. Henri Dunant organized the neighboring villagers who did what little they could to cope with the gigantic task of ministering to those whose lives might still be saved.

But Henri Dunant did more. The vivid and terrible scenes he had witnessed so impressed themselves upon his mind that a year or two later he published his experiences in a small volume entitled "Un Souvenir de Solferino" (A Remembrance of Solferino), in which he advocated the formation of voluntary organizations to aid the army authorities in carrying out the national obligation of caring for the sick and wounded in future campaigns.

The result was the organization of the great world-wide Red Cross Society.

In this day and generation, with the events of the Great World War still fresh in mind, it is unnecessary to attempt any review of this international neutral, humanitarian organization. Sufficient it is to say that probably no other organization in the world's history has a finer record of achievement, or so completely commands the confidence and support of all peoples. The Red Cross flag and insignia is known and respected everywhere as a sign of disinterested neutrality among warring nations, and the highest standard of self-sacrificing service to all suffering humanity.

Organized for service to the sick and wounded of armies in time of war, its amazingly efficient organization and outstanding service during the Great War so impressed the statesmen of the world confronted with all the difficulties of an on-the-war reconstruction of a well-nigh bankrupt civilization, that the Peace Conference at Versailles unanimously called upon the Red Cross throughout the world to remain organized and active, and undertake a comprehensive peace-time work among the civilian populations.

To the Red Cross, therefore, the creation of Henri Dunant, was accorded the distinction of being the only organization, apart from Governments, recognized in the Covenant of the League of Nations, with the solemn obligation imposed on all nations joining the League to encourage and promote the organization of voluntary national Red Cross Societies, having for their object "the promotion of health, the prevention of disease, and the mitigation of suffering throughout the world."

Today throughout the world, the Red Cross with its tens of millions of members, including all races, languages and creeds, is engaged in its mission of mercy. When Nature in a violent mood brings disaster upon a small community, or a Province, or a whole nation, the Red Cross is the first on the spot. Should an epidemic of disease break out, the Red Cross nurse and voluntary service, inspired by the heroic and humanitarian ideal of Dunant and Florence Nightingale, are active in the alleviation of suffering. Unceasing, too, is the Red Cross educational campaign in the promotion of health and the prevention of disease. And should war again inflict rankin, the Red Cross will be found better organized and stronger than ever to assume the burden thus imposed upon it.

In the galaxy of the world's great humanitarians, Pasteur, Jenner, Lister, Florence Nightingale, William Booth, Curie, and others, the name of Henri Dunant shines brightly, while the sympathy which prompted his action on the bloody field of Solferino, and the inspiration leading to the conception of a great neutral volunteer organization in the cause of suffering humanity, continues to call forth the most splendid self-denial and service under the banner of the Red Cross.

## Stocking Alberta Fishing Waters

A total of 1,624,675 potential game fish were distributed in Alberta fishing waters in 1927. These included eyed eggs, fry and fingerlings of Loch Leven, Cutthroat and Rainbow trout. In addition, nearly three million whitefish eggs were placed in commercial fishing waters in order to maintain the supply of fish for this growing industry in the province.

## Timed By Hockey Clock

One of the electric clocks invented or developed in 20 years work by W. F. Martin, of Port Arthur, for use in scoring time at hockey matches, will be installed in the House of Commons where the 40-minute rule is now in effect, calling for the same accuracy in measuring time while members are speaking (with interruptions cut) as in hockey games.

## When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid. The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## Textile Plant For Edmonton

MIL AT Edmonton Will Convert Western Wool Into Fabrics—The establishment of a plant in Edmonton by the Western Canada Woolen Mills, Ltd., is contemplated during the coming summer, according to an announcement made recently. This project has been under an exhaustive series of technical experiments. The mill production has been scheduled to include a range of fabrics including blankets, light and heavy tweeds, overcoatings, velours, flannels and other types of cloth for which western wool is suited.

## RICH, RED BLOOD A REAL NERVE TONIC

The Source Of All Nervousness Is Weak, Watery Blood—Many people, both men and women, find themselves run down, through overwork, or anxiety. Such sufferers find themselves tired, low-spirited and depressed. The nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

During the last few years, a powerful new blood tonic has been discovered. The only rich nerve tonic is a good supply of rich red blood. There is no relief to nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto depressed people bright and cheerful. Miss Irene Denne, R.R. No. 1, Washington, Ont., tells what Dr. Williams' Pink Pills did for her as follows: "I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time. Trying one medicine after another, I was advised to try Dr. Williams' Pink Pills and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvelous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or can be bought by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

## Faces Carved On Building

Likenesses Of Men Prominent In Chemical Work Appear On New Structure

Faces of living men are carved in stone on the new million-pound building of the Imperial Chemical Industries nearing completion at Westminster Exchange.

One of the faces is that of the head of the concern, Sir Alfred Mond. All the other carvings are said to be excellent likenesses of many men prominent in the chemical world. The sculpture around the building also includes figures of peacocks, which are said to be there as a symbol of incorruptibility, following the ancient tradition that the flesh of the peacock is incorruptible.

Nation-Wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most effective remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

## Film Industry In Calgary

Production of the first of a series of British films for use under Great Britain's quota law will be started in Calgary this month, May 1. Local capitalists, including P. Burns and A. E. Cross, are backing the project. Neal Hart will be the director of the first picture, which will be western in its flavor.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

## Buying Registered Seed

Saskatchewan Farmers Have Purchased Much More This Year—The Saskatchewan Registered Seed Association advises that farmers throughout the province have purchased more registered seed this year than in any year in the past and that they are becoming more interested in good seed. There has been a heavy movement of tractors from United States points to points in Saskatchewan this spring and the sale of motor trucks has greatly increased. Evidently farmers are becoming more and more interested in mechanical power.

During the war, Germany raised 12,000,000 men.

Insist on Minard's Liniment—accept no other.

**Zam-Buk**  
FOR THE SKIN!

## Recipes For This Week (By Betty Barclay)

### QUEEN GEORGIA'S CAKE

- 1/2 cup shortening.
- 1 1/2 cups sugar.
- 3 eggs.
- 1/2 cup sour milk.
- 1 teaspoon soda.
- 1/2 cup raisin juice.
- 1 cup nectar raisins.
- 1 teaspoon salt.
- 1 teaspoon nutmeg.
- 1 teaspoon cloves.
- 1 teaspoon cinnamon.
- 2 cups flour.
- 4 teaspoons baking powder.

Plump raisins, drain and chop, using a coarse cutter. Cream together shortening and sugar. Add 3 beaten eggs yolks and 1 white (save remaining whites for frosting). Raisins, sour milk, and raisin juice. Combine with flour sifted with baking powder, soda, salt, and spices. Mix thoroughly. Pour into 3 greased layer cake pans and bake 15 minutes in a moderate oven (350 degrees F.). Put together with boiled frosting.

### JUNE WEDDING SALAD

Cover individual salad plates with crisp leaves of head lettuce. Place on these, strips of fresh or canned pineapple, one-inch squares of orange pulp, cut thick, and a few smaller sections of sweetened grapefruit pulp. Top with a mound of flavored whipped cream and a maraschino cherry or strawberry. Just before serving add a little lemon sauce—juice of one lemon mixed with two tablespoons granulated or powdered sugar. An ideal salad for wedding feast, or for a company dinner.

## Record Building Activity

Building and construction contracts awarded in Canada during the month of April, 1928, totalled \$56,345,800 in value, the largest total for any month ever recorded except for May, 1926, when \$57,139,700 worth of new work was contracted for. During April this year, \$116,000,300 was the total of contemplated work to the Dominion. This total is the largest ever recorded for any month without exception.

The accumulative contracts awarded total for the first four months of the year is surprisingly large compared with previous years. It now stands at \$125,617,100.

### Calgary's Population

Calgary's municipal report on the city's population places the total at 72,500 this spring. The figures given by the census of 1926 were 65,513. Two hundred houses were erected here last year, and 300 will be built this year. There is an increase of 50 per cent in the quantity of household effects being brought in by new residents. Blocks and apartment houses are all full and hotels are operating at capacity.

Useful in Camp—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

### Will Construct Power Plant

Construction of the first unit of a big power plant in the Estevan coal field is announced by the Montreal Engineering Company—a \$750,000 project which will represent the first actual development of power in Saskatchewan by a central generating station for distribution over a wide territory.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

National wealth of Canada is announced as \$2,772 per head of population. Get in the line early and make sure of your share.

Minard's Liniment for falling hair.

"Can you give me an example of wasted energy?"  
"Yes sir; telling a hair-raising story to a bald-headed man."

Heat naturally flows from a hot body to a colder one even in the electric refrigerator.

## Wheat Pool Building - Fastest Grain Elevator

Elevator Now Under Construction Will Have a Capacity Of 6,000,000 Bushels

Work has begun on the construction of a 6,000,000 bushel capacity grain elevator at Port Arthur for the Saskatchewan Wheat Pool, which, it is said, will be the most modern and the fastest operating terminal elevator in North America. It will be ready for operation about October 15, 1928. When completed it will be served by both the Canadian National and Canadian Pacific Railways, and will be able to receive as many as 500 cars of grain per day during the rush season. It will have a capacity of 300 cars per day of ten hours, and will be able to ship out grain at the rate of 150,000 bushels per hour.

The total length of the new elevator known as Terminal No. 7, will be 1,344 feet and the width 226 feet. The elevator trackwork will provide space for 225 loaded cars to be spotted at one time, ready for dumping by the five automatic car dumpers, each of which will completely unload a car of grain in ten minutes on the average. To take care of this immense volume of grain 28 elevator legs will be required to take the grain to the top of the elevator, from whence it is dumped into the scale garsers.

The completion of this terminal elevator will give the Saskatchewan Wheat Pool a total capacity of 22,975,000 bushels at the head of the Great Lakes which, together with a 2,000,000 bushel terminal elevator at Buffalo, and the space provided by the Pool country elevator system in Saskatchewan, will give a total grain storage capacity of more than 50,000,000 bushels for the 1928-29 crop year.

### A Timely Suggestion

The farm hand took his girl for a buggy ride. Nine miles out in the country the horse dropped dead. Louise said she knew she'd drop dead, too; it was a terrible predicament. "Suppose I give you a nice sweet kiss. That will put lots of life in you." "Are you sure that a kiss will put lots of life in me?" "Positive, darling." "Then, suppose you kiss the horse."

## FIREPROOF Farm Construction

GYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations—for remodelling—for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gyproc protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick and easy to apply. It can neither crack, warp, bulge or shrink. By filling the joints with Gyproc Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gyproc comes in broad, light, ceiling-high sheets of gypsum. It is especially suitable for Alabastine. Fuel saved by the insulating qualities of Gyproc will alone pay for the cost within a few seasons.

Clip and fill in coupon for interesting free booklet.

## New Developments In Method Of Harvesting And Threshing Will Revolutionize Farming

More marked progress in the development of methods of harvesting and threshing grain applicable to the prairies of Western Canada has been made in the past two or three years than in the previous half century since the first stream of settlers crossed the Red River. The new methods of combined reaping and threshing are resulting in great economies in labor and money. When first introduced the combine or reaper-thresher was considered to have limited applicability and that principally to the drier sections of the country. Nevertheless the number of these machines in use has increased very greatly and they are spreading over a much broader area than was thought possible.

A supplementary machine introduced on the prairies for the first time last year, says the Department of the Interior, through its Natural Resources Intelligence Service, is expected to further extend the field for direct harvesting and threshing without the need for the expensive and time-consuming operation of stockpiling the grain. The new windrow method is calculated to advance materially the time at which harvesting can be commenced as compared with the combine alone. In fact it is claimed by those who have tried it that cutting can be commenced as soon as the new machine is that the stubble is cut high and slightly turned over forming a shelf on which the grain is laid out in windrows to dry. With the air currents passing underneath, curing is rapidly effected. In two to four days of good drying weather the grain is ready for threshing and with a pick-up attachment the combine is then used to finish the operation, delivering the threshed grain to the tank wagon. Later in the harvesting season the grain in other fields may become sufficiently matured for direct combining without first windrowing.

The windrow machine it is claimed has removed all the disadvantages of the combine. If so the new methods may be expected to quickly spread across the prairies and revolutionize the harvesting of grain in Western Canada. Nowhere in the world is there land more suitable to large scale methods of harvesting and the resultant economies may be expected to further enhance Canada's position as the premier wheat exporting country of the world.

### Vancouver Island Strawberries

#### An Exceptionally Heavy Crop To Be Gathered This Year

A heavy crop of strawberries is in prospect on Vancouver Island, B.C., this year. A press dispatch from Vancouver states, The Gordon Head and Keating crop is expected to pour hundreds of thousands of dollars in to the farmers of Sanich this summer as a reward of persistent adherence to modern cultivation and weevil control methods. While the acreage planted to strawberries shows substantial increase, anticipations of a bonanza crop rest chiefly upon the remarkable condition of the plants, which are in better shape than has been known for many years.

Nineteen carloads of beef cattle, 418 head, were shipped recently from Ashcroft, B.C. to Toronto, Ont., the largest shipment of cattle from that part of British Columbia to Eastern Canada.

A "mechanical man" that plays chess and automatically responds to the moves made by its human opponent has been invented by a Spanish mathematician.

Alexander the Great died of a fever in Babylon in the year 323.

"Who is the man you greeted?" "The second husband of my first wife."—Journal Amusant, Paris.

### TALENTED CANADIAN SINGER

Isabelle Burnard, the talented young Vancouver singer, who is being acclaimed both in England and in France for her ability, is to be presented at court by Hon. Mrs. Peter Larkin, wife of the Canadian High Commissioner in London.

### Winnipeg Newspaper Union

Extremely Graceful

Lustrous golden brown crepe satin combines with wrong side of fabric in a charming dress, with the outside front plaited at waist line and tied in a sash. Wool crepe, printed and plain crepe, two tones of silk crepe, georgette crepe and lightweight wools with silk crepe are also fashionable for design No. 813. Patterns can be had in sizes 16, 18 and 20 years; 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1 1/2 yards of 32-inch contrasting and 1 1/2 yards of 27-inch lining. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

### Developing Tar Sands Deposits.

The Hudson's Bay-McMahon Oil Company has made application for exclusive rights to prospect a very large area in the Alberta tar sands region in Northeastern Alberta. Negotiations are now in progress between representatives of the company and the Federal Government. This company will this year spend \$50,000 in the erection of plants for the extraction of oil from the sands.

People of France are buying fewer automobiles this year, and French factories are turning out a lesser number of cars than usual.

### IMPROVES QUALITY OF WOOL

#### Sheepmen Advised To Keep Out Dark Hairs When Shearing

"We are well satisfied with the Canadian wool we have been handling for the past seven years," B. C. Windeler, of Windeler & Company, operating in London and Bradford, England, and representing the Canadian Co-operative Wool Growers in Britain and Europe, told the Wool Growers at Toronto "when visiting there the other day. 'There is a big demand for your clip and mills who have tried it out are coming back with repeat orders.'"

In discussing wool with G. E. O'Brien, General Manager of the Canadian Co-operative Wool Growers, Mr. Windeler stated that he had one suggestion to make and one which could easily be carried out by the sheepmen themselves. In shearing the heads and legs, it is customary to remove the dark or grey hair, particularly where the Down breeds are being handled. This amounts to practically nothing in weight, but when it is tied up with the rest of the fleece it gets mixed in so with the wool during processing in the mills that it cannot be removed. These little short dark hairs will not take the dye and therefore they make the wool less fit for manufacturing into the more expensive light colored yarns, blankets, and cloth. Mr. O'Brien states, that in his opinion, the bulk of the dark fibre complained of in Canadian wool is traceable to this cause.

Sheepmen are strongly advised by the Canadian Co-operative Wool Growers to make sure that these tufts of hair do not get in with the fleece. As previously mentioned there is practically no loss in weight when this material is thrown away.

### Plan New Settlement

#### Belgian Farmers Intend To Establish Colony In Alberta

What may be the nucleus of an entire new settlement in Alberta arrived in Winnipeg recently in the persons of a group of 20 Belgian farmers, members of the party of 450 new settlers to the west.

Though possessed of some capital and practically a life time's training in agriculture, these Belgian farmers plan to work on Canadian farms for several months to gain familiarity with farming methods over here. When they feel they know enough about the conditions in Canada, they plan to send for their families and relatives, and establish a whole colony near Magrath, Alberta. Each member of the group expects to bring about five families to the proposed colony, which, if all goes well, will be established next year.

In addition to this interesting group, the immigrant special brought west 80 Dutch farmers who will settle in northern Alberta, mostly in the Peace River district. Several British families settling under the Empire Settlement scheme and British workers of all sorts made up the rest of the large party of immigrants.

General Summerall says: "Desire for peace does not insure it." No, and desire for a meal doesn't satisfy hunger; but it does start you toward a restaurant.

### BRITAIN'S HIGH COMMISSIONER TO CANADA

Sir William H. Clark, K.C.S.I., C.M.G., who has just been appointed Great Britain's first high commissioner to Canada, commenced his career in the public service as a clerk in the board of trade department of the government in 1899.

### Boy World Explorer

That bright-eyed goddess Adventure of whom everyone from the youngest to the oldest has dreamed has beckoned to Lowell Thomas, a Winnipeg boy, and will lead him on an adventurous path around the world. He has been chosen by Lowell Thomas, world-famous explorer and lecturer, to go, with him as secretary of his next expedition into the jungles of Africa, to the South Sea Islands and into practically every corner of the globe.

Dixon, who is 20 years of age, has been employed for the past three years in the offices of the Canadian Pacific Railway at Winnipeg. When Lowell Thomas was lecturing in the city and made a statement to the press that he was looking for a Canadian boy to go with him in December, Russell got busy and landed the job, that will mean a year or so of rare adventure. First class shorthand knowledge, and an aptitude for photography and mechanics were some of the most important requirements for the position. Satisfying Thomas along these lines, an agreement was reached.

The fortunate Winnipegger will, next month, leave the Press Department of the Company where he has been employed, and join Mr. Thomas at his home in the Berkshire Hills. From this point the start will be made about December on the great adventure that will carry him into many of the little-known corners of the globe.

### Proved His Ownership

#### Chicago Man Showed Police Stolen Chickens Knew Him

Ypk Devers learned that there was 16 chickens in the South Chicago Police Station, which had been removed from a couple of boys. Since he had been mysteriously deprived of that many, he called around to claim them.

"How do you know they are yours?" asked the sergeant. "That's easy, if they're mine, they'll talk to me," came the reply from Ypk. He was led to the cell and admitted. A few words in Dutch; and 16 hens started a riotous flapping of wings and cackling in response.

"They're yours, take 'em away," piped the sergeant above the uproar.

The Spartans never wrote a single line that was considered literature.

## New Golf Course At The Banff Springs Will Be Unique Among The Golf Courses of the World

Canada will shortly possess one of the finest and most beautiful golf courses in the world. Assisted by an army of skilled workmen Stanley Thompson, of Toronto, the internationally known golf architect, is making rapid progress with the construction of the new championship golf course which is being built for the Canadian Pacific Railway Company, at Banff, Alberta, and present indications are that the course will take its place at the top of the list of golf links on this continent whether island or seaside.

Situated on the roof of the world and surrounded by the most magnificent of this recent undertaking of the railway. To make the fairways, greens, and tees, vast areas of rock had to be quarried. Rivers, too, had to be bridged and soil brought by the trainload on which to grow the turf. It will be readily understood therefore that the cost will run into a big figure, but the Company will have the compensation of knowing that the construction of this latest championship course will act as a wonderful fillip for Canadian golf links as a whole, as thousands of the best known golfers of the world will be drawn to this golf course perched as it is between the peaks of the Rockies.

A view of a completed portion of the links set in wonderful surroundings under the guardianship of the mighty snow-capped mountains.

cent mountain scenery imaginable, the Banff Springs will be unique among the golf courses of the world. It will be of full championship length, the plans calling for a yardage of 6,640. There will also be two other sets of tees with a respective yardage of 6,315 and 6,045. These tees will be of grass and will be in play the whole time, the bunkering having been so carefully worked out that each set of tees presents practically a different course. The fairways, too, will be doubly wide, there being two distinct routes to each hole.

Noted golfers who have viewed the construction work have been astounded with the thoroughness and magni-

ing-built along the lines of the famous "Langara" green at South Vancouver. They will be extra large and will be sown throughout with creeping bent grass.

Contrary to what one would expect in the mountains, there will be very little climbing to be done, in fact the grades will be easier than on most courses. Nine holes of the new course will be open for play during the present season. Combined with nine holes of the old course this will mean that visitors this year will be able to enjoy a full round of eighteen holes amidst perfect surroundings. Early in May, 1929, the new championship course will be thrown open.

### THE FARM BARN

#### No Longer Overshadows the House In Importance On the Modern Homestead

Feminine movement and general increase in education may or may not be responsible, but it is certain today that the farm barn, long the most carefully built structure on the American farm, today is of no more importance than the house.

This emergence of the farmhouse for years a neglected feature on many farms, into a carefully designed and cared for building, is emphasized in a discussion of the residential value of the modern American farm in the Farm and Fireside magazine for May. Farmers, as well as their wives, are in many cases, realizing that the farm is capable of being an excellent place to live today, and not merely a place of hardship and work without recreation.

"An item of importance," says the magazine, "is the residential value of farms. This concerns the farm as a place to live, for agriculture is today both a business and a mode of life."

Right along with the value of a farm as a productive tract of ground, the prospective farm buyer today considers school, church and social facilities of the neighborhood, neighbors and the general healthfulness for his family, says the magazine.

### Motor Sled For Coasters

The trouble of walking back after a good ride down a hill has been obliterated by a motor sled that has just appeared in Germany. It is propelled by a cogwheel driven by a one and one-half horsepower gasoline motor. On the side the drive-wheel is disconnected and the sled coasts. Then the engine is operated for the return trip. The sled has made nearly 20 miles an hour on level surfaces, and the footrests are heated by exhaust gas from the engine.

An artist was engaging a model. "Can you sit absolutely still?" he inquired.

"Oh, yes, rather," she replied, promptly. "I was in the Civil Service for several years."

The optician takes a day off when the rent collector comes around.

### VETERAN RETIRES

W. A. Brown, General Superintendent of the Canadian National Railways, Edmonton, who, after 50 years of continuous railway service in Canada, retired on superannuation on May 1. In point of active service Mr. Brown is the oldest railwayman in Canada, west of the Great Lakes. He was railroading when there was no steel laid west of Portage la Prairie. He has been General Superintendent at Edmonton since 1911.

Mr. Brown is succeeded by W. R. Devenish, formerly General Superintendent of the Canadian National Railways at North Bay, Ontario.

### Higher Than Mount Robson

Mount Robson, 12,922 feet, long considered the highest peak in the Canadian Rockies, has been forced to give up this distinction to a new mountain, which is 296 feet higher. It is to be named Mount Waddington, after a British Columbia pioneer. The recent discovery of this new peak demonstrates that Canada no doubt possesses many other wonders yet unknown.

### Exported Carload Of Honey

For the first time in the history of bee-keeping in British Columbia, one bee-keeper in the Okanagan Valley has exported a full carload of honey from his own hives. His 250 colonies gave him an average of 175 pounds of honey per colony.

**SINCE** the introduction of the "New Series", Pontiac Six has shattered all its own high records of success! Why? Because here is all Pontiac's proven dependability... all Pontiac's well-known strength and stamina... all Pontiac's economy...

And in addition... new, dazzling beauty... new style and smartness... new, long, low Fisher bodies... new, modish color harmonies...

... new engine refinements... new fuel-pump (replacing vacuum-tank)... new GMR cylinder-head... new Four Wheel Brakes... new Lovejoy Hydraulic Shock Absorbers...

And because the New Series Pontiac Six is the lowest-priced six in the world that can give you all these desirable features and qualities.

#### THE NEIGHBORS WEEDS

"What is the use of destroying weeds on my farm when my neighbor lets them grow, and seeds from his weeds blow over my place?"

This was one of the commonest questions which speakers sent out by the Ontario Government on a weed campaign this spring had to face. It is a question that is often heard in Saskatchewan and Alberta, too. As pointed out by John Buchanan of the Ontario Agricultural College, when such is the case it is a great nuisance, causes much extra labor and seems unfair.

Legislation against weeds may help the situation but there will always be people who will be more careless than others regarding weed control but even in this case the innocent victim can help himself as weeds can be brought under control even in a field next to a dirty farm, or a highway or a railway where, too often, weeds have been allowed to go unchecked. The Ontario Government officials found that many farmers were able to keep their weeds under control on their own farms despite the negligence of their neighbors and these farmers found it profitable to do the necessary extra labor because of the larger returns they reaped from the crop. It was found that the use of good clean seed, clean cultivation, short rotations and the employment of such smother crops as sweet clover had brought weeds under control even in those fields next to the highway and the railway or just over the fence from farms where weeds had been allowed to grow luxuriantly.

But weed control, where the pests have been allowed to have their own way is a costly business. A case was cited of a field, so badly infested with twigs that it was not giving a crop worth harvesting, cost ten dollars an acre to clean up. Yet after this, with clean seed and clean cultivation, a crop worth several times ten dollars an acre was taken off every year. The same principles applied to this farm in Ontario with equal results in Saskatchewan and Alberta. —Saskatchewan Farmer.

#### RED CROSS CELEBRATES BIRTH OF FOUNDER

It is perhaps not generally known who was the founder of the world wide organization "The Red Cross Society" but this week fifty-nine nations celebrate the centenary of the birth of Henri Dunant born in Geneva, Switzerland, May 8th, 1828, and died October 31st, 1910.

While witnessing the battle of Solferino at Lombardy, Italy, June 24th, 1859, when forty thousand men were killed or wounded on the field, he gathered together a group of kind-hearted women from the neighboring towns, and this small band did what they could to lessen the misery of the wounded, making no distinction between friend or foe.

In 1862 he returned to Geneva and wrote and published a pamphlet "A Souvenir of Solferino" an eloquent plea against the horrors of war, and in conclusion asked "if it would not be possible to found and organize in all civilized countries permanent societies of volunteers which in times of war would render succor to the wounded without distinction of nationality." The appeal in the pamphlet was so outstanding that prominent officials in Geneva organized themselves into what they called a Committee of Five and extended a general invitation to various European countries to a conference at Geneva at which they would discuss ways and means of carrying Monsieur Dunant's ideas into operation. The conference met on October 26th, 1863, and was attended by the delegates from fourteen European governments and seven philanthropic societies. Out of the deliberations of this conference grew what is now known as the Red Cross Society. The insignia of the Society is the Swiss Flag with the colors reversed.

Thus was born the first Red Cross Society, whose primary purpose was the care of sick and wounded soldiers and prisoners of war. Today Red Cross activities have extended far beyond this field. Relief of suffering at all times, improvement of health, prevention of disease, health education, hospitals and nursing outposts on the rims of civilization, there you will find the Red Cross doing a noble christian duty.

The Red Cross fights disease, soothes and heals the sick and wounded, educates the ignorant, and saves humanity in many ways unsung and unknown to the average individual—and the wonder of it is that this great work is carried on by voluntary subscriptions!

Now aren't you glad you support the Red Cross?

## The No. 4 Climax Cultivator

This Cultivator has Extra Heavy Duty Drag Bars and it is designed primarily as a Killer of Weeds.

An Exclusive feature of the Climax is the patented Depth Regulator used with the power lift only.

When approaching a soggy spot in the land where the points would sink deep and call for more power to pull through, a few turns on the wheel of the Depth Regulator raises the points. The operator does this without moving from his seat on the tractor, or if on the seat of the Cultivator, and he does it with out stopping. All power lift machines are equipped with the patented Depth Regulator.

This Cultivator can be had in three sizes, 7 ft., 9 ft., 12 ft., and can be had in Horse Hitch or Tractor Hitch.

COME IN AND LET ME SHOW YOU THESE MACHINES BEFORE YOU BUY. I HAVE A CLIMAX TO SUIT YOUR NEEDS.

Mr. Wm. McWilliams purchased the S.W. of Section 48-46-8-4.

Mr. J. E. Keene purchased the N.W. of Section 3-46-9-4.

### FIVE YEARS AGO

From Irma Times, May 25th, 1928

Imperial Oil Co. to make location for new well near Battle River bridge. Oil was found in the West Regent well near Monitor.

Son arrived at the home of Mr. and Mrs. M. T. Knudson, May 7th.

Welcome rain arrived to start crops

Mrs. J. D. Elliott of Drumheller was visiting friends in Irma before she went to Tacoma, Washington, where her husband had gone to reside.

Douglas Hatch fell and broke his arm.

Residents of Ward 3 held a roundup and took up over 400 head of stray horses that had been running at large. About 50 head were unclaimed and were placed in the pound.

### VIKING\*

B. W. Richardson, D.D.S., writes us that he will be ready to begin the practice of dentistry in Viking permanently on June 5th. He has purchased a new up-to-date dental chair, and other modern dental apparatus, which will make his office well equipped from the beginning. He has leased space above the drug store where he will open offices. Mr. Richardson is a graduate of the University of Alberta and comes highly recommended.

A few auto accidents have occurred during the past few days. Emil Pobuda ran into a big Nash sedan and smashed a fender and did other damage; Mrs. W. Brown and S. Truman had a little mix-up with the result that Truman's car is undergoing repairs; and Art Stoney's car came to grief about six miles west of town and got badly damaged, and Art had a shoulder bone broken, the others in the car got well shaken up.

The Viking Elks ball team and band have been engaged to play at the Irma Sports which will be held on Wednesday, June 13th. Watch for large posters announcing the various events.

Viking Elks Lodge was honored by an official visit from Bro. Heller, District Deputy Grand Exalted Ruler, Edmonton, who was making his annual inspection of this lodge. Bro. Heller instituted the Viking Lodge just a month over a year ago, and was highly pleased at the rapid progress the Elks have made in a year, and also called attention to the growth of Elksdom all over the Dominion, and Newfoundland, from coast to coast.

Bro. Heller, is expressing itself in the fine type of men it draws to itself. This is not so remarkable, however, when it is taken into consideration that Elksdom as an order has no religious or political ties. He also pointed out the benefits of the clubs throughout the land, but these he said, were secondary to the great principles of the Order: Charity, benevolence, fidelity, love of country, and the brotherhood of man. Bro. Heller took occasion to compliment Bro. McAtthey, secretary on his books which he said were the best kept of any he had seen. Bro. Heller assisted in the initiation of three candidates after which there was an hour for refreshment and singing.

Playing in mid-season form, the Viking Elks ball team easily defeated the Vegreville team last Friday evening by the score of 11 to 5. The first three innings were the best of the nine played. Viking rolled in three scores by some neat playing and it looked as if Vegreville was in for a bad trimming but they bucked up and made a few on errors before the contest was over. In spite of a rather one-sided score, there were many old spots in the game that were good enough to bring forth cheers from the crowd. Whitford in the box for Vegreville was hit freely and had to be relieved before six innings. Yikie, who started the game for Viking in the box, showed some real class for five innings when he was derided because Manager Runyon thought the game was salted away, and put in Wylie Brown for a couple of innings, and then tried out young Fitzmaurice for the remainder of the game, both of whom showed a great deal of promise and will be a big help during the season. Some "old-timers" on the Viking team strutted their stuff in great fashion. Ely Jones the old reliable on first, Monte on second and Art Horton on short, are going good this year. Other promising youngsters are Buzz Jones, Sid Ross, Max Gray, with Mark, the catcher showing more class than he has for a couple of years.

It looks as if Viking is in for some good baseball this year.

## CHEVROLET Selling Good USED CARS because we sell Good New Cars

BECAUSE the 1928 Chevrolet is the finest car we have ever had to offer to the public, we have received in trade some of the finest Used Cars we have ever had on our floor. The exceptional value of the new Chevrolet has brought in many used cars that would not ordinarily have been traded in for several years. And the Used Car buyer benefits by this situation . . . not only by getting a better car, but also by reaping the advantage of reductions in price.

You can buy here with every confidence. The reputation of our Chevrolet dealership stands behind the Used Car we sell. Come in and let us show you some outstanding values.

## CHAPTER XXIV.

It was at Fort Simpson, in November, on his way out, that Jack Doran heard of the war. They had floated down the Nehanni River on a moose-skin barge to the Liard, and down the Liard to the Mackenzie on a spruce scow, arriving in Fort Simpson one raw November day when an icy wind from the North gave warning of the freeze-up. They had brought with them a few furs, which George, the half-breed guide, had got with his trap-lines, and from the sale of these they hoped to be able to buy supplies for the home journey.

The summer had been full of adventure. They had seen the leaves come on the trees, the flowers bloom and fade, the leaves fall, and now the lowering clouds of November driven by the cold winds, but with their bags full of gold quartz to show what they had found, and their little heap of dust carried in chamois bags and glass phials, they were elated and confident.

Jack, with all the eagerness of the amateur, had been full of enthusiasm going in, and in the washing of gold from the sand of the river he had enjoyed endless delight. To see the glint of yellow gold in the black sands at the bottom of a pan fired his imagination. Keith had complimented him on his success in panning. "She's getting better all the time," Keith had said, "so we are getting closer to the deposits." He had a map of the country showing the exact spot where the claims would be staked. "You'll have some nuggets to bring home to that new wife of yours that will make her eyes pop out of her head."

It was in September they reached the place, and Keith announced the object of their search achieved. They studied their claims and gathered some rich pieces of quartz to bring back with them. Keith was exultant, and even George, the half-breed, grew garrulous with the prospect of riches. He was going to have three cars and a colored driver in a gray uniform!

Keith had the plan for mining all arranged. He showed them where the sluices would be placed, drawing a diagram to show the angle at which they would be set and how the riffles would be put in the bottom. He would bring the water in a pipe-line from

farther up the river, and throw it against the banks of gravel in powerful jets. At the falls, up the river he would generate the electricity to run a stamp mill, where the crushed rock would be reduced to powder and passed through a sieve, and the gold collected on copper plates. "You'll see a bigger trek to this field than there was in ninety-eight," he assured his eager listeners.

The return journey, lacking the stimulus of novelty which had kept them from discouragement going in, was toilsome and depressing. Their way lay through a gloomy, barren country, and the weather was cold and wet. The shortening days and lengthening nights too, were unfavorable to travelling. But at length, rugged, unkempt, unshaven and dirty, they arrived in Fort Simpson just before the freeze-up.

The good-natured proprietor of the store bought their furs outfitted them, giving them the news of the war as the transactions went on. "I wish I was younger, and I'd be off," he said, "I'd like to do a bit of fighting before my time comes to step off." "What is it all about?" Jack asked, as he tried on a pair of long boots. "Well, I'm not clear on that, but sure it's a poor war that ain't better than no war, and you see war has to come once in a while to clear out the surplus population. We breed too fast, the other three are going out, either pestilence, war, or famine, and war's a lot more fun than the other two!"

Jack looked at him indignantly. "How many children have little half-breeds around the store, moon-shoed, noseless, beady-eyed, looking inquiringly at the strangers. The storekeeper did not resent the question at all. "I think there are six boys big enough to go," he said. Three of them are out on the trap-lines and haven't heard about it yet. The other three are going out. Their mother is cutting up a little, but she'll calm down; she's a good woman. We have eight others coming on. It's a good chance for the boys to see the world."

The war did not relate itself in any way to Jack Doran until he arrived at Peace River. He had one consuming thought in his mind now, and that was to get to Eagle Mines as soon as he could, and to Helen. He went at once to the telegraph office and sent her a wire: "Mrs. Jack Doran, Eagle Mines:—Back safe, expect me in a week. Love, Jack."

Peace River was alive with excitement. Homesteaders walked the streets waiting for the train to take them to Edmonton. There was some delay, owing to trouble on the Judith Hill.

Jack, Keith and George got a room at "The Peace," and soon had the grime of travel washed away, and went to the dining-room for supper. Men in uniform sat at a table, eating noisily and drinking. The room was full of excited talk.

There was a meeting in the hall that night, advertised by a huge red poster in the stores. It said that Major Gowssett and Pts. George Crowe would address the meeting. Pts. Crowe had been wounded at Mons and been invalided to Canada. There were days in the dining-room, and on the way to bed, they had noticed flags flying from the houses and stores, fluttering bravely in the cold wind.

To the hall they went at eight o'clock, and were met at the door by women selling red roses for the Red Cross. A band inside was playing "It's a Long, Long Way to Tipperary." To Jack it seemed as though he had come back to a new world, a nervous, panicky, half-strung world, abounding in new phrases, new emotions. Fresh from the solitude of the North, he could not at once grasp the meaning of it all.

Pts. Crowe, a pale, thin, standing with a crutch, spoke first, and spoke simply and well. His superior officer had chided him for the mildness of his address at Spirit River the night

before. "You've got to put more thunder into it," he said, "those people want color and action. Tell them about the children you saw with their hands cut off." "But I didn't see any," protested the lad. "Well, you heard of them; you might have seen them. Speed up a little—lay it on thicker, or you'll never get recruits."

But again the boy told what he had seen, the mud, the hardships—the indescribable carnage—the comradeship and heroism of his companions of the trenches. There was no hatred, revenge or bitterness in his heart, only a great bewilderment. He appealed on behalf of his comrades—they were so brave, so cheerful and so fine, so willing to die.

Jack's heart was torn with the pity of it. Worst of all was the boy's twitching hands, never still a moment. What horrors that boy must have come through! His lips had quivered as he spoke, like a child's about to cry. "Don't leave those boys alone, send them reinforcements. The more we can send the sooner it will be over." That was the message of the quivering lips, coming from a heart that was clean and brave. He could talk without apology, could Pts. Crowe, he could ask any person to make a sacrifice and not ask them to do more than he had done.

Major Gowssett, who arranged the program, had left himself for the last. In the ordinary affairs of life Major Gowssett believed in being first, but understanding what he would have called "mob-psychology," he believed the last speaker had the best chance. He began by damping the Germans with great spirit, reviewing their history, military aspirations, and their home life. He showed that they threatened the whole world. Major Gowssett had not been further than Boulevard during the present war, but one would never know it from his speech. It reeked with the stench of battle, it abounded in personal incidents. He dragged his listeners into shell-holes, dug-outs and across "No Man's Land"; he specialized on the treachery of the Germans—the hatefulness of their women—the bitter hatred they had instilled into their children. He had lived with them, he said, and he knew it. Lord Roberts knew the war was coming, but England had not listened to him.

(To Be Continued.)

BABY'S OWN TABLETS  
THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are so soothing, but do not grip. They are laxative, but do not contain one particle of mercury, or other ingredients that can in any way do the slightest harm to the most delicate child. Baby's Own Tablets reduce fever, relieve colic, stomachic and indigestion, check diarrhoea, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in the home, and once a mother has used them for her little ones she will use nothing else. Thousands of mothers bear testimony as to this. Among them is Mrs. Hurst, Pine Falls, Man., who writes: "I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly think they are the most medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

A six-week-old calf was nibbling at the grass in the yard and was viewed in silence for some minutes by the city girl. "Tell me," she said, turning quickly to her hostess, "does it really pay you to keep such a small cow as that?"

Minard's Liniment for Toothache. The man who tries to prove too much very often proves nothing.

One way to put in your time is over the pawnbroker's counter.

The Experience of Mrs. Roy Brown is Well Worth Reading

Peterboro, Ont.—"I was in a miserable state of health, my nerves gave way completely; I could not sleep, had black-aches and was completely exhausted—so weak and sleepy and tired that I was compelled to give up and take to my bed. I was advised to try Dr. Pierce's Favorite Prescription, as nothing I had used had helped me. By the time I had taken one bottle I was able to be up and around. I kept on taking it and was completely restored to health. I cannot say enough in praise of the 'Favorite Prescription' for the wonderful help it gave me."—Mrs. Roy Brown, 221 King St. All Druggists, Tablets or Liquid.

Exact cup tests carried out in our blending rooms insure for Red Rose Orange Pekoe Tea a quality that is absolutely uniform. This superiority is imparted to you at its peak of freshness and flavor because it is packed in aluminum—the only package worthy of its fine quality.

## Teeth and Health

Edited by The Canadian Dental Hygiene Council and Published by The Canadian Dental Society

## CHILDHOOD DISEASES AFFECTING TEETH

It occasionally happens that teeth erupt early in shape or with the abnormal pitted and stained and you wonder what has caused it.

Now a very probable source of this trouble is a general disturbance from some constitutional disease associated with high temperatures, such as scarlet fever, measles, or chicken pox. Occasionally this disturbance is so great as to totally destroy the tooth germ, but more often it merely affects the tooth structure as described above.

But there are two general diseases that, in particular, affect tooth structure and tooth eruption. Of these rickets is a disease of faulty nutrition and it is worthy of note that it is a disease not only of the very poor who are denied proper and sufficient food, but of the rich, who have an abundance of food but of an improper kind.

The characteristic affections of the teeth from rickets are these: In the deciduous teeth erupt late and, in the more extreme cases, there is a general deformity of the skull and jaws, moreover, these teeth erupt early, whilst the permanent teeth in turn erupt late; the result is, faulty or crooked teeth. Furthermore, the teeth themselves are structurally affected being bluish, sparse and somewhat tapering.

For other disease, more or less specifically related to tooth malformation is tuberculosis. Tuberculosis will erupt both the deciduous and permanent teeth early; but the root of deciduous teeth is not absorbed as it should be, with the resultant mal-position of the succeeding permanent teeth.

It is perhaps easier to understand why these diseases should injuriously affect tooth structure as they do, when we remember that the teeth are in the formative stage through early childhood, and hence are readily liable to influences of a disturbing nature.

## No Cause For Worry

Great Britain Still in a Position To Pay Her Debts

It is regrettable that to the United States presidential election campaign there have to be injected unwarranted attacks upon Great Britain. Here is what Senator Reed, in an address before the Daughters of the American Revolution, had to say: "England has been given 60 years in which to pay her debt to us, and God knows if she will be there that long."

Does the fact, the Halifax Herald wonders, that the Reeds are in the midst of a political campaign give them warrant for such unmitigated nonsense. Perhaps it does. But when they have calmed down, may they run across this contemporary utterance by Winston Churchill, British Chancellor of the Exchequer: "England is not done yet. She still has the power to help a friend or pay a debt."

And Great Britain probably will enjoy that power for many years to come, when the Senator Reeds will have been lost in oblivion and when much that passes for "one hundred per cent. Americanism" will look silly in retrospect.—Regina Daily Post.

## Canada To Establish

Bureau Of Standards

Action Of Government Will Be Acceptable To Provinces

The Government proposes shortly to set up a Bureau of Standards which will operate under the National Research Council, according to Hon. James Malcolm, Minister of Trade and Commerce. When the new Bureau of Standards is established, he said, Canada will not be able to accept her standards from Chicago. A Bureau of Standards would be acceptable to all the provinces of Canada as well as to the electric power companies throughout the Dominion, the Minister claimed.

## Good Price For Prize Steer

Annie Turner, 11-year-old girl who clanked up with her steer at the Kamloops, B.C. bull sale and then proceeded to do the same at Calgary, afterwards led the animal into the ring at Edmonton, where it fetched 50 cents a pound liveweight, the purchaser being the Hudson's Bay Company. The sale netted \$900, in addition to which prizes averaging \$150 were won at each of the three shows.

Neuralgia succumbs to Minard's Liniment.

## An Outstanding Invention

Two Ontario Men Have Plans For Quick-Firing Machine Gun

The attention and interest of the world's war departments, especially the highest ordnance officers, are focussed on London, Ont., at the present time because in this city plans have recently been completed for a new machine gun that is undoubtedly the most outstanding quick-firing invention yet perfected.

Otto P. Rindelhardt, superintendent of the Carling Brewery, assisted by H. Koenig, of Germany, now of London, is the inventor of this weapon which may have an important effect on the armaments of the world. Defects of both cooling and recoil systems prevalent in the machine guns of a nation in the world war have been entirely done away with in the new London gun, that is the result of seven years' tests and proving.

Probably the greatest advance made in the new quick-firer is its long-sought feature of non-explosive liquid air cooling—a goal sought by the war research laboratories of all nations. This invention alone can be readily disposed of for a very large sum, as the liquid air, which has been extremely dangerous to handle in the past, is now rendered perfectly safe. At last a machine gun that will not overheat, and necessarily have to cease action to cool off, has been built.

## Speed Up Construction

German Contractors Use Furnace On Wheels To Dry Walls

Homes and apartments are so scarce in Berlin, Germany, that architects and constructors think up every conceivable device for hastening the process. Their latest quick service help consists of a furnace on wheels which is calculated to hasten the drying process in buildings under construction. It is placed outside the house or apartment building, and furnace pipes are laid from it into the room to be dried. The heat is conducted just as though a hot air furnace were in operation in the basement.

In this way, it is estimated, construction is hastened by many days, as the painters and decorators can get busy much earlier.

Next month another 1,100 head of buffalo will be shipped from the Canadian National Park at Wainwright to the big reserve north of the Peace River. Overstocking of the Vancouver Park renders this necessary.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken from becoming chronic and saves hours of awful suffering.

The Arabs were the first to discover the art of refining sugar, with the Egyptians a close second.

## Always Keep Cuticura Preparations On Hand

The Soap, because of its absolute purity and emollient properties, is unsurpassed for every-day use. Assisted by Cuticura Ointment it does much to keep the skin and scalp healthy. Cuticura Shaving Cream makes shaving easy for tender-faced men. Cuticura Talcum is the ideal toilet powder.

## Why Gum-Dipping Increases Tire Life

A tire in use is being constantly bent backwards and forwards by road action. Such movement generates friction and heat that has a deteriorating effect unless the tire is built to withstand it.

In the carcass of a Gum-Dipped tire there is less friction to generate heat because Gum-Dipping puts a coating of new live rubber around each separate cord that keeps it from rubbing against the cords that lie next to it. It stays cooler and therefore lasts longer.

Your local Firestone Dealer will gladly advise you on your tire problems. See him today. FIRESTONE TIRE & RUBBER CO. OF CANADA LIMITED
